AI INTERVIEW PRACTICE FOR THE WELDING TRADES

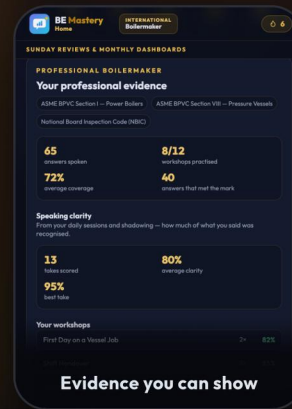

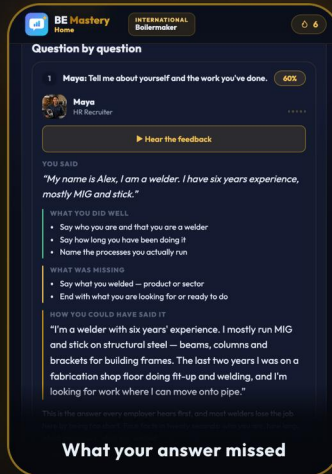

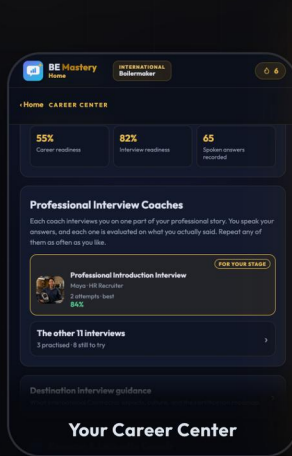

Sit the interview *before it counts.*

Twelve interviewers and a whole crew in the room. You speak your answers out loud, and every one is read back against what a competent answer needs — then you are shown the sentence you should have said.

12 interview coaches, each on one part of your story

12 workplace scenarios, first day to final briefing

5 people in the room — HR, supervisor, safety, QA

1 Professional Interview Coaches

Maya on your story, Daniel on teamwork, Priya on safety. **Twelve of them** — pick any, repeat it as often as you like.

2 Workplace scenarios

Not one voice — the whole crew, on the same job, in the same conversation. **It goes like the real floor goes.**

3 Your professional evidence

Answers spoken, coverage, best take, trade words you have actually used. **Nothing is scored from a tap** — only from speech.

4 Resume & LinkedIn Coach

Your summary rewritten to read professionally, plus **what your destination expects** — its culture and its certification roadmap.

Professional Speaker

Interview Beginner

STEP 1

Choose who interviews you

HR, your supervisor, the tool room, safety or QA — whoever you dread most.

STEP 2

Say your answer out loud

No typing. You talk, the way you would talk across a desk.

STEP 3

Hear what you missed

The person who asked tells you what was missing — then you run it again.
