

**BE Mastery**

Executive Polish — inside the Phrase Lab

app.lomonec.com

THE TEN MINUTES BEFORE YOUR MEETING

Rehearse the meeting *before the meeting.*

Say the words you were going to say anyway. The app hands them back the way a leader would say them, tells you which phrase made the difference, and reads it aloud until your mouth owns it. Then you walk in and say that version.

WHAT YOU WERE GOING TO SAY

"Yesterday I had a meeting with the technical lead and this is what we did. Today I will be working on the API and tomorrow we will be working on the tests."

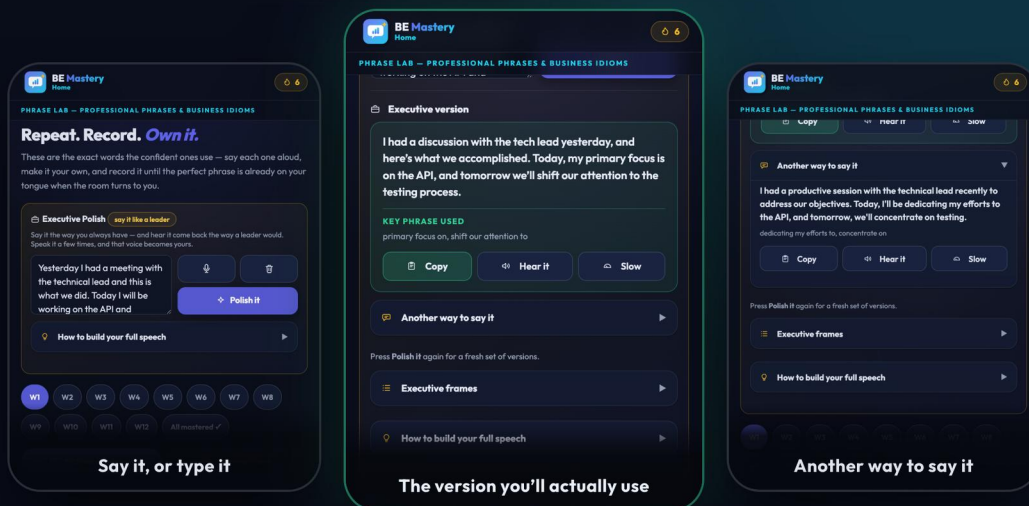

**WHAT YOU SAID INSTEAD**

"I had a discussion with the tech lead yesterday, and here's what we accomplished. Today, my primary focus is on the API, and tomorrow we'll shift our attention to the testing process."

YOU KEEP primary focus on

shift our attention to

Nothing is wrong with it. It just doesn't sound like the person running the work.

**1****Say your update**

Tap the mic and speak the **standup** you are about to give — or paste it. **Takes twenty seconds.**

2**Polish it**

Two executive versions come back, each naming **the phrase that made it stronger.**

3**Hear it, repeat it**

Play it at full speed, then slow. Say it back **until the new words feel like yours.**

4**Walk in and use it**

Say that version in the room. **Next meeting, the phrase arrives on its own.**

Executive Polish needs internet — the rest of the app works offline. Only the sentence you write is sent; your recordings never leave your phone.
